Data Residency, Security, and Compliance

- Nerdio Manager for WVD is an all-PaaS packaged Azure application that runs in your own tenant without ever compromising security and compliance by allowing third-party vendors to access your environment.
- All resources are deployed to your Azure subscription in a region of your choice, with data never leaving your own Azure subscription.

WVD + Nerdio

- Deploy a complete WVD environment in an afternoon without any PowerShell scripting.
- Save money with advanced autoscaling and unified image management.
- Enable your help desk to manage all aspects of WVD with a powerful and intuitive portal.
