

## **IGEL Technology Thin and Zero Clients Now Available Through SYNEX GSA Schedule**

[IGEL Technology Sales Corp.](#)'s entire family of thin and zero clients and software solutions for the managed workspace were recently added to [SYNEX Corporation's General Services Administration Schedule](#) No. GS-35F-0143R.

Through the SYNEX GSA schedule, IGEL Technology will be able to broaden its reach among U.S. federal, state and local government agencies, while making it easier and more efficient for IGEL partners serving the public sector to deliver IGEL's innovative solutions to their end-user customers.

IGEL Technology's thin and zero client solutions provide the public sector with a flexible, efficient and user-friendly alternative to the PC. With IGEL Technology, government agencies can improve productivity, quality and service with a broad range of Linux and Microsoft Windows® based hardware, supported by a powerful remote management software and software defined thin clients. Additionally, IGEL thin and zero clients enable federal, state and local government agencies to reduce the cost of doing business, speed time-to-market, and promote IT security.
