

IGEL Technology Opens New North American Headquarters in San Francisco

*Leader in Software-Defined Thin Client Solutions and Workspace Management Software
Asserts its North American Growth Focus with New Bay Area Office*

SAN FRANCISCO, July 20, 2016 – [IGEL Technology](#), a world leader in the delivery of powerful workspace management software, software-defined thin clients, and thin and zero client solutions, today announced the opening of a new North American headquarters in San Francisco. A strategic milestone in the company's North American expansion plans, the new office will be home to a growing team of IGEL Technology marketing, sales and operations staff including the recently announced President and CEO for IGEL North America Jed Ayres.

"IGEL Technology is embarking on a significant North American expansion effort to capitalize on the rising demand for the software-based workspace management that enables flexible, secure and productive endpoint computing," said Ayres. "Our new office in the Bay Area will serve as the central command center for our growing operations as we accelerate our market share growth with an accretive channel engagement model, compelling marketing programs and the release of innovative new technology to power the high-performance client computing experiences today's businesses require."

The new IGEL Technology North American headquarters office, at 540 Howard Street, opened on July 1, 2016. To support IGEL Technology's strategic growth plans, the company will be making key hires in the areas of sales, marketing, finance and operations in its new San Francisco office. About IGEL Technology

A world leader in the delivery of powerful remote management software, software-defined thin clients, and thin and zero client solutions, IGEL Technology helps organizations improve the agility, efficiency, and security of their virtual desktop and application delivery systems.

IGEL produces one of the industry's widest range of hardware thin and zero clients, based on Linux and Microsoft Windows, and leads the market in software based thin clients allowing customers to access a broad spectrum of server-based infrastructures and applications. IGEL also offers powerful and intuitive management software for easy deployment and administration of thin clients throughout any size organization. Partnerships with industry leaders including Citrix, VMware, Red Hat, Microsoft and Cisco, ensure that IGEL provides the most up-to-date technology and trustworthy security to clients in industries that include Healthcare, Education & Research, Public Sector, Financial, Insurance, Retail, Logistics, and Manufacturing.

IGEL has offices in the United Kingdom, Australia, France, the Netherlands, Austria, Belgium, Switzerland, Sweden, the United States, Germany, Shanghai, and Beijing and is represented by partners in over 50 countries worldwide.
