

IGEL Education

Enabling success through knowledge and collaboration

IGEL Academy, our Learning Management System (LMS), is the focal point for learning all things IGEL. This serves to enable our partners and customers to reach their goals faster through formally constructed and socially farmed content from throughout the IGEL community.

Imagine what happens when you make training and learning a core philosophy within your business! At IGEL, we strongly believe that education goes a long way towards your success. IGEL Academy equips your teams with the skills they need to extract maximum ROI from IGEL's solutions. The IGEL Academy LMS gives learners access to formal product training through self-paced eLearning, certification programs, social interaction with peers and specialized live training.

Anywhere Access for Everyone

- Free access to foundational training course on IGEL products: IGEL Certified Professional (ICP)
- Instant certification upon passing exams.
- Free access to IGEL's social learning (coach and share): This is a place where certified IGEL experts produce and post informal training videos on various specialized topics and serves as a repository for useful recorded webinars and ad-hoc trainings.

Accelerating Time to Value

Investing in education makes financial sense. According to Gartner, untrained employees take up to 22.5 hours to achieve the same skill level that a trained employee can achieve in just 5 hours!

- Engaged and well-trained employees are more efficient, bring quality performance, and make fewer mistakes.
- eLearning gives overburdened IT staff the flexibility in where and when they'd prefer to learn.
- Certification provides validation of the IT Professional's skills, leading to project success.

IGEL Instructor-Led Training Services

In addition to the self-paced training available through our eLearning portal, customized on-site training is available for larger numbers of students within one organization.

On-site training includes:

- IGEL Custom Training Services (fixed fee).
- An on-site trainer prepared to instruct up to 15 students.
- Live demonstrations of each topic covered with Q&A.
- Vouchers for up to 15 students to take the certification exam on the IGEL Academy LMS are included.
- PDF of all training materials, including images of the slides presented during the course.

Access to the IGEL Academy LMS is free to everyone! Premium content is coming soon and will be available through an annual subscription.
