Shifting workspace execution and sensitive data from endpoints to the data center or cloud with VMware Horizon 7 provides IGEL OS and IGEL Utopia™ with a complete "chain of trust" from device boot to cloud workspace execution.

Customer Impact

When Budd Baer Auto, a family-owned automotive dealer and repair business, embarked on a $10 million facilities and infrastructure upgrade, they turned to VMware and IGEL for the end-user computing infrastructure that their business relies on.

The combined capabilities of VMware and IGEL enables fast, simple, and economical management and control of endpoints with the ability to centrally manage and update virtual workspaces from the cloud.
