DEPLOY AND MANAGE ENDPOINTS FOR A THIRD OF THE COST WITH IGEL

THE HIDDEN COST OF CORPORATE PCs

28% of Windows PCs still running Windows 7 as of May 2020

Windows PC Costs

- Hardware Purchases
- Device Provisioning
- OS Upgrades
- Patches
- Remote Configuration
- Technical Support

SHIFT WINDOWS TO THE DATA CENTER OR CLOUD

REVIVE PCS INSTEAD OF REPLACING THEM

GET MORE MILEAGE FROM NEW ENDPOINT HARDWARE

REDUCE DEPLOYMENT COSTS BY 75%

IGEL OS IS THE SIMPLE, SMART, AND SECURE WAY TO DEPLOY, MANAGE, AND CONTROL ENDPOINTS.

Migrating your cloud workspaces from traditional Windows PCs to IGEL-managed endpoints will reduce both CapEx and OpEx, freeing up IT budgets and resources to focus on strategic initiatives that advance your business.

CUT ONGOING MANAGEMENT COSTS IN HALF

The combined benefits of IGEL OS and cloud workspaces continue to yield substantial cost savings on an ongoing basis. Fast and error-free updates, simpler technical support, elimination of remote Windows patching, and lower overall endpoint software licensing costs cut recurring endpoint management costs by more than 50%.*

REDUCE OVERALL ENDPOINT TCO BY TWO-THIRDS

When you combine hardware refresh avoidance or deferment with lower deployment and ongoing management costs, overall endpoint TCO is reduced by 66 percent.*

REPLACE A COSTLY WINDOWS MIGRATION WITH MILLIONS OF DOLLARS IN COST SAVINGS

When you apply the TCO advantage of IGEL-managed endpoints at enterprise scale, you can realize millions – or even tens of millions – in cost savings.*

REPLACE WINDOWS PC UPGRADES

Running Windows in the data center or cloud rather than on PCs greatly reduces deployment and management complexity. Desktop-as-a-service offerings like Windows Virtual Desktop and Amazon WorkSpaces make this model accessible to all organizations without a substantial up-front investment.

PAY TOLL AHEAD

Rather than repeating the same costly PC cycle, many organizations are rethinking their approach with Windows 10.
