

5 STEPS TO FASTER AND MORE SECURE HEALTHCARE DIGITAL WORKSPACES AND ENDPOINTS

Healthcare workspaces and endpoints are distributed and extremely costly to manage and maintain

PATCHES AND UPDATES

PC REFRESHES

...and high spend doesn't equal high quality patient care with optimal outcomes

Slow logon times

Poor responsiveness

Unsupported peripherals

Single-sign-on issues

Frequent PC cart recharging

Healthcare endpoints are a top target for cyber attacks

Hospitals are more vulnerable than any other type of organization. Outdated systems, lack of experienced cyber personnel, highly valuable data, and added incentive to pay ransoms in order to regain patient data are magnetizing cyber criminals to the healthcare market."

CYBERSECURITY VENTURES, 2019 ALMANAC

REAL-WORLD HEALTHCARE RANSOMWARE ATTACKS BY THE NUMBERS

	PATIENT RECORDS LOCKED	DOWNTIME	RANSOM PAID	TOTAL RECOVERY COST
Southeastern U.S. Health Center	20,000	2 Months	\$70,000	\$1 million
