

## ABOUT US

---

Digital Transformation Starts  
with **Viewing Solutions**  
**Differently**

# About **Process Fusion**

Process Fusion is a software company and cloud service innovator. We help organizations transform inefficient, paper (labor) intensive business processes into a secure, automated, mobile ready Digital First experience for all participants.

Organizations can easily migrate their traditional Print, Capture and Workflow systems onto our secure cloud platform to simplify IT management, reduce cost and to ensure business continuity and security compliance.

By incorporating machine learning and robotic process automation (RPA) capabilities onto our intelligent cloud platform, organizations can reduce error associated with manual document processing and cost associated with inefficient workflow.

## **DIGITAL READY**

We live in a time that is increasingly digital. The global pandemic is changing the future of work and accelerating the digital transformation of all businesses. As a leader this is where you can drive a digital growth agenda and accelerate change to adapt in the next normal.

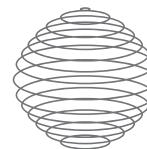

Process Fusion's cloud print management and intelligent document processing platform can seamlessly connect and transform any physical workflow into a "Digital First" automated process.

## **PROCESS MOBILITY**

With many businesses now shifting to a hybrid workplace and more staff are working remotely, there comes the need to securely deliver business processes that were traditionally centralized to a distributed model.

Process Fusion's Digital First platform enables digital mail, fax and print management for workers working anywhere. The intelligent platform can easily extend business processes to remote workers using secure web connection and Virtual Desktop Infrastructure (VDI) from Citrix, VMWare and Microsoft.

## **BUSINESS CONTINUITY**

The global pandemic requires all businesses, large or small to ensure business continuity, deliver productivity while continuously adapt to the new normal.

Process Fusion delivers business continuity for your organization's document-centric processes by migrating on premise Fax and Print servers, Document Capture and Workflow management systems to a secure, scalable cloud platform with high availability and geo-redundancy.

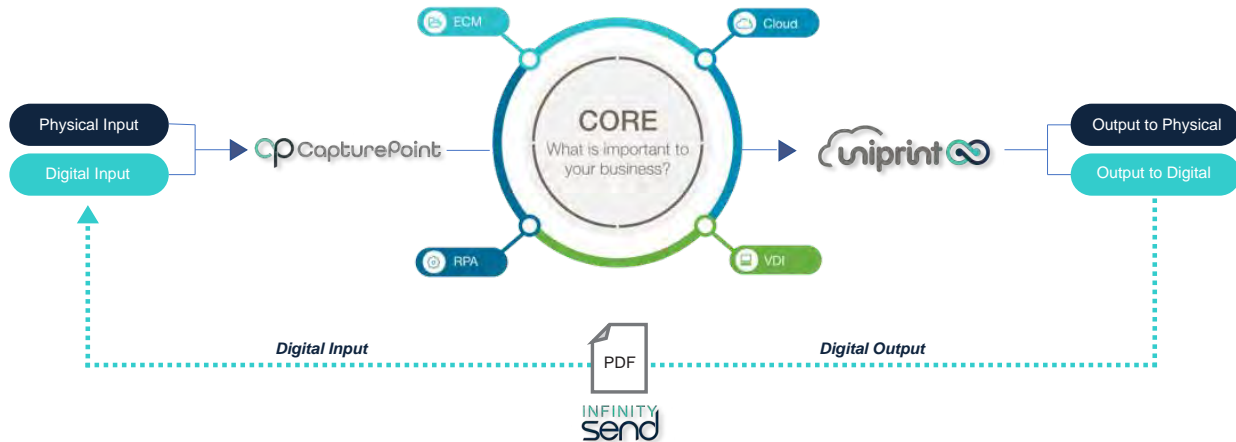

## Our **Vision**

At Process Fusion we are passionate about business outcome. Our vision is to transform inefficient business processes into secure, automated, mobile ready Digital First experience for all participants.

## Our **Mission**

It is our mission to develop an intelligent cloud platform to simplify management of traditional print, capture and workflow infrastructures, while incorporating advanced machine learning and robotic process automation (RPA) capabilities onto our cloud platform to reduce error and labor costs associated with inefficient business processes.

# Our Digital First Solutions

## CapturePoint

CapturePoint is an intelligent capture and document processing platform built for the needs of today's digital enterprise, so users can be more informed through every workflow process. Our cloud platform combines machine learning, advanced recognition, robotic process automation and real-time analytics into a single, scalable platform to handle every type of input document. automated process.

## UniPrint Infinity

UniPrint Infinity is an on-prem, hybrid or cloud-based print management platform that enables organizations to improve their output business workflows and thrive in the new normal today. Our print vendor agnostic platform focuses on driving digital transformation through secure, location-based document output and shifting print to digital.

## Managed Application Services

Our managed application services for on-prem or cloud environments, provide the right mix of seasoned professional experts for ongoing support, maintenance, upgrades, and customization of applications, so that your business can focus on higher priority goals.
