

CapturePoint Data Validation Services

Ensure better data accuracy, improve process efficiency, and reduce operational costs

High Volume Systematized Workflow Automation

Process Fusion is partnering with service providers worldwide to deliver the most accurate and scalable data capture and data entry service directly into your CapturePoint platform.

Better Data Accuracy

Ensure 99.5%+ data accuracy with service providers leveraging CapturePoint's AI platform.

Lower Cost Management

Benefit from lower costs and less IT expenses, which can be applied to other resources.

100% Secure

Process Fusion is SOC2 Type I certified running on the Microsoft Azure platform.

Faster Turnaround

With integrated software and fast services, data validation and processing time will be reduced.

Highly Scalable

Our service providers are fully capable to ramp up and handle large data validation volumes.

Organizational Focus

Focus on growth and innovation without having to spend time and resources on lower priority tasks.

CapturePoint Data Validation Service Providers

All our service partners leverage the CapturePoint platform to deliver their own data validation services can your validated data directly into your system with full process integrity

On-Shore Data Validation

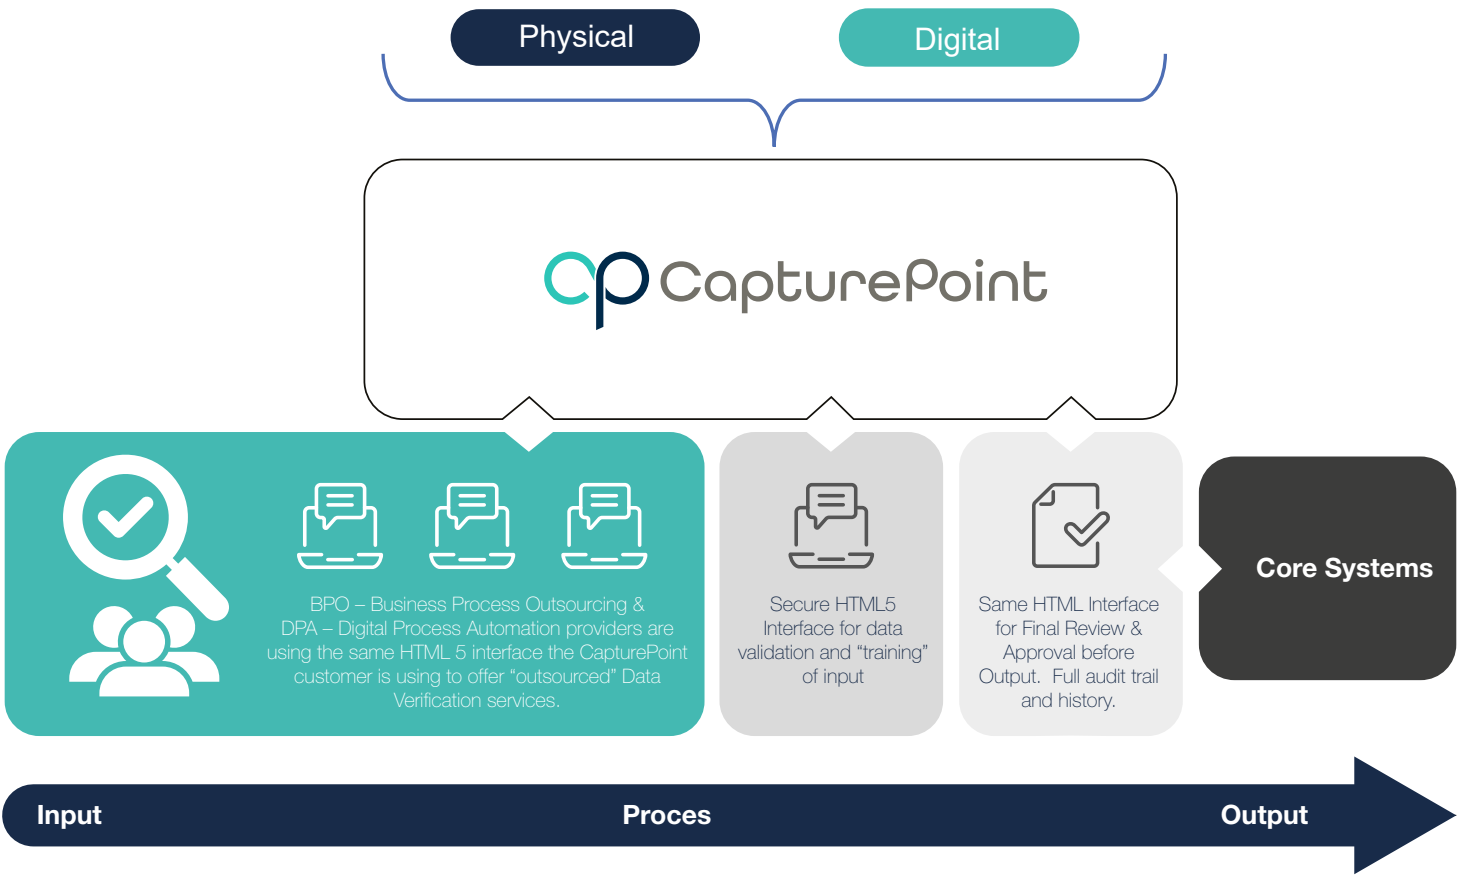

Process Fusion has partnered with world-class service providers in Canada, US, and the UK to deliver top of the line on-shore data validation services.

Off-Shore Data Validation

If data sovereignty is not a requirement, Process Fusion has also forged a partnership with an offshore provider located in Malawi, Africa to deliver high quality, highly cost-competitive validation services.

How It Works

Whether it is data entry (key from image) or validating extracted data, you can configure a workflow to “route” documents from any process to have data validated by Process Fusion directly on your platform with full process integrity and audit trail.

Key Features

CapturePoint's data validation services will help drive business transformation in your organization. Leverage consistent, quality data, which is an investment that enhances organizational decision making, data governance, and growth across crucial business operations.
