

BENEFITS OF IGEL OS 11 MIGRATION PLAN

MIGRATE TO IGEL OS 11 AND GET MORE BANG FOR YOUR BUCK!

The IGEL OS 11 Migration Plan offers our customers an opportunity to migrate to the latest operating system at a low cost, with a migration path to suit your business. With IGEL OS 10 at end of maintenance (EOM) on July 31, 2022, now is the time to plan your next step to optimize your endpoint infrastructure, bolster your security posture, and offer your people a great user experience.

Why Migrate to IGEL OS 11 (Workspace Edition)?

IGEL OS 11 is simply better! Advanced features for enterprise, extended security, and up to 130 integrated technologies offer IT Teams the best operating system for the modern workspace. Our customers' feedback and feature requests have had a significant impact on our evolution to IGEL OS 11. To continue getting the most out of IGEL features and services, and to receive the latest security fixes to keep your users' devices protected, take advantage of this limited-time offer and migrate your endpoints to IGEL OS 11.

A TOP-NOTCH USER EXPERIENCE

The era of hybrid working is here and now. Advanced capabilities are essential for IT teams to provide a productive workspace for employees to collaborate from their chosen device and location.

- IGEL works closely with Citrix, Microsoft Azure Virtual Desktop, VMware, and AWS to quickly integrate the latest clients and protocols (in some cases, on Day One) for virtual and cloud workspaces.
- IGEL OS 11 combines forces with Zoom, Microsoft Teams, Cisco, and the most popular unified communication partners to leverage the very latest acceleration and optimization technologies, to provide a high-fidelity and seamless audio and video experience for meetings across global teams.
- Use the devices you already have and optimize your infrastructure. IGEL OS 11 can be easily installed on your people's laptops, PCs, and mobile thin clients from the **most popular vendors**, and even comes pre-installed on HP, LG, and Lenovo devices. With **IGEL UD Pocket**, you can boot IGEL OS 11 on a personal device for a secure and managed remote work strategy, even temporarily, simply remove the UD Pocket to revert to the original operating system.

SECURITY IS KEY

IGEL OS 11 has built-in and proactive security to protect your business. A dedicated security team at IGEL focuses on the continuous optimization of security features, rapid fixes for vulnerabilities, and integrated capabilities from our partner ecosystem such as multi-factor authentication and single sign-on technologies. IGEL OS 11 and the latest management allow IT to easily update remote endpoint devices, a critical measure to safeguard from ransomware threats and other forms of malware.

DONT MISS A BEAT - SIMPLIFY MANAGEMENT AND INCREASE IT AGILITY

Save time and IT resources with enhanced and scalable capabilities for remote management. Evolved in lockstep with IGEL OS 11, the Universal Management Suite (UMS) is a powerful console for IT admins to remotely configure policy controls, update or lock-down end-users' devices, and maintain control over applications and data across globally dispersed endpoints. The UMS Web App and several extensions offer further capabilities for the seamless management of hybrid workspaces.

FUTURE-PROOF YOUR BUSINESS - GOODBYE IGEL OS 10, HELLO IGEL OS 11!

Why compromise? Get the latest IGEL OS and enjoy all of the benefits of a modern workspace powered by an operating system optimized for VDI and DaaS, that provides a solid base on which to plan your journey to the cloud. The IGEL OS 11 Migration Plan offers maximum value for your investment. In addition to an extensive list of security and management capabilities some of the most popular functions you will benefit from with IGEL OS 11 include:

Work from home made easy with enhanced capabilities for rapid and secure access to company apps, data, and desktops for remote employees. Essential for today's hybrid workplace.

Includes a **Multi-Media Codec Pack (MMCP)** that supports a high-fidelity and seamless audio and video experience for meetings across global teams.

Add-On Licenses are available for:

Ericom PowerTerm (for no additional fee)
Teradici PCoIP Ultra Client, and 90meter Smartcard

Portable licensing allow IT admins to move a license from one device to another, even remotely.

Choice of Support Levels to suit your business
