IGEL

IGEL ADVANCED SERVICES

New Use Case Workshop

Getting maximum ROI from your Edge OS deployment

Included in this package:

This service includes a deep dive of your IGEL Environment and will help you determine additional use cases for your IGEL deployment.

To help you identify these new workflows, the service includes an analysis of your existing IGEL deployment, configurations of your existing use cases and adherence to IGEL best practices. IGEL will provide a full report containing a complete assessment including any recommended changes discovered during the engagement.

AREAS OF FOCUS

- IGEL best practice assurance

- Additional / New Use Cases & Workflow Optimization

- IGEL device management / UMS administration

DOCUMENTATION DELIVERABLE

- New Use Case Workshop Report highlighting additional IGEL use cases

CUSTOMER BENEFITS

- Maximize Investment: New Enhanced Workflows that align with your Business Needs

- Drive long term strategy: Move with advances in technology to ensure business efficiency, through modern workspace practices

- Improved User Experience: Optimized Profiles that meet today's technology standards

- Greater visibility: In-depth Reporting to show device management in a whole new way

- Save time: A well designed and efficient IGEL environment to allow IT staff to spend less time administrating and more time innovating

PRICING AND DELIVERY

The IGEL New Use Case Workshop package can be fully customized. The package is based on a customer's specific requirements; thereby eliminating risk and budgetary uncertainty. The package is offered at a fixed price. Contact your IGEL representative and arrange a scoping call.
