IGEL AVD Paid Pilot

IGEL Microsoft Azure Virtual Desktop Production-Ready Paid Pilot

Proving the Value:

Sometimes, seeing a great demo is not enough to decide on your edge operating system, virtual desktop and applications. If your organization wants to test Microsoft Azure Virtual Desktop on IGEL OS, the IGEL AVD Paid Pilot offering will allow you to experience how AVD and IGEL work together in the “real world”.

With an IGEL AVD Paid Pilot, you get the full experience of being an IGEL customer and get to experience Azure Virtual Desktop in real life scenarios. When the pilot is complete and all roadblocks overcome, you're ready to invest further in IGEL. Your Pilot environment is designed from the ground-up with Production in mind.

You are responsible for your own Microsoft environment, virtual desktops and licenses and we'll make it will work with IGEL.

WHAT'S INCLUDED

- An IGEL subject matter expert
- IGEL resources available for up to 3 months
- 30 IGEL Workspace Edition licenses (Valid up to 3 months)

CUSTOMER BENEFITS

During the Paid Pilot, the IGEL subject matter expert will help and guide you through a proven deployment methodology. Here are some of the key elements:

- Assist in creating an architectural design based on an assessment of the technical and business needs
- Deploy and build the environment
- Configure and customize the environment
- Conduct user testing and collect feedback
- Cross-train and educate staff

PRICING AND DELIVERY

The IGEL AVD Paid Pilot is a package based on a customer's specific requirements; thereby eliminating risk and budgetary uncertainty. The package is offered at a fixed price. Contact your IGEL representative and arrange a scoping call.
