

# REVOLUTIONIZE YOUR DIGITAL LANDSCAPE

A comprehensive solution for IT Modernization, Cybersecurity, and  
Managed Service Adoption.

## ABOUT COMPUTERVault

Developed over 10 years, ComputerVault takes an infrastructure-based approach to solving these problems by deploying Virtual Desktops, Virtual Servers, with a built-in Cybersecurity suite. ComputerVault is only installed on-site at the customer's location, never in a public cloud, and is sold as an annual fixed-cost seat license. All ongoing administration and support are included in the annual seat license.

ComputerVault is a Digital Transformation Platform developed to overcome the major challenges facing organizations:

- IT Modernization
- Cybersecurity
- Managed Service Adoption

# CYBERSECURITY SOLUTIONS

ComputerVault includes a wide range of cutting-edge Cybersecurity solutions designed to protect your data.

## Advanced Threat Protection

Deploying Virtual Desktops and Virtual Servers, ComputerVault builds a software defined perimeter that proactively mitigates end-user generated threats. Reducing the threat of malware, ransomware, and susceptibility to phishing attacks.

## Zero Trust Security

The company embraces the Zero Trust security model, which assumes that no one, whether inside or outside the organization, should be trusted by default. ComputerVault ensures that every user and device is authenticated and continuously monitored for suspicious activities.

## Data Encryption

Protecting sensitive data is paramount. ComputerVault encrypts data both in transit and at rest, making it virtually impenetrable to unauthorized access, even if a breach were to occur.

# CYBERSECURITY SOLUTIONS

## Scalability & Flexibility

ComputerVault's solutions are scalable, making them suitable for businesses of all sizes. Whether you're a small startup or a large enterprise, their cybersecurity offerings can be tailored to meet your specific needs.

## Compliance & Reporting

Regulatory compliance is a concern for many organizations. ComputerVault helps businesses meet compliance requirements through robust reporting and auditing features.

## 24/7 Support

Cyber threats don't adhere to a 9-to-5 schedule, and neither does ComputerVault's support team. They offer round-the-clock assistance to ensure that you are always protected.

## Secure Remote Access

With the rise of remote work, securing remote access to corporate networks is critical. ComputerVault provides secure remote access solutions, enabling employees to work from anywhere without compromising security.
