IGEL
Island

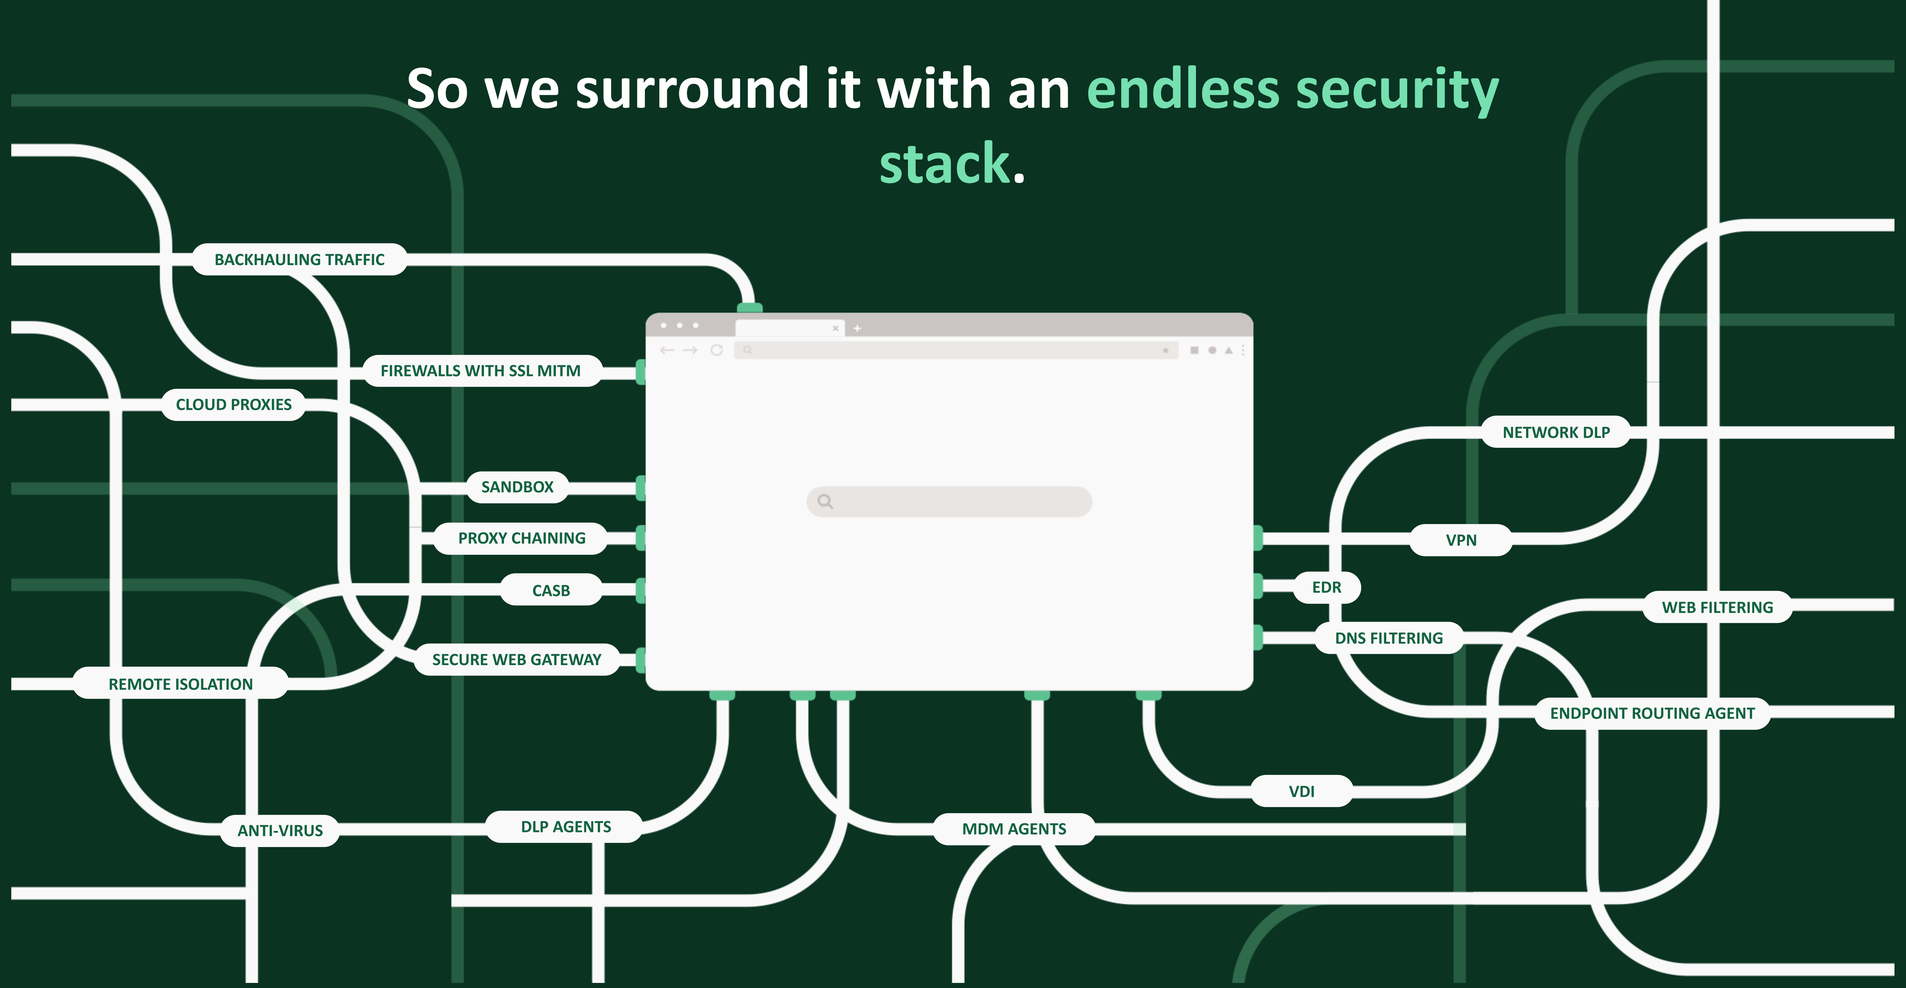

Most Pervasive Application Delivery Platform on the Planet

The Browser

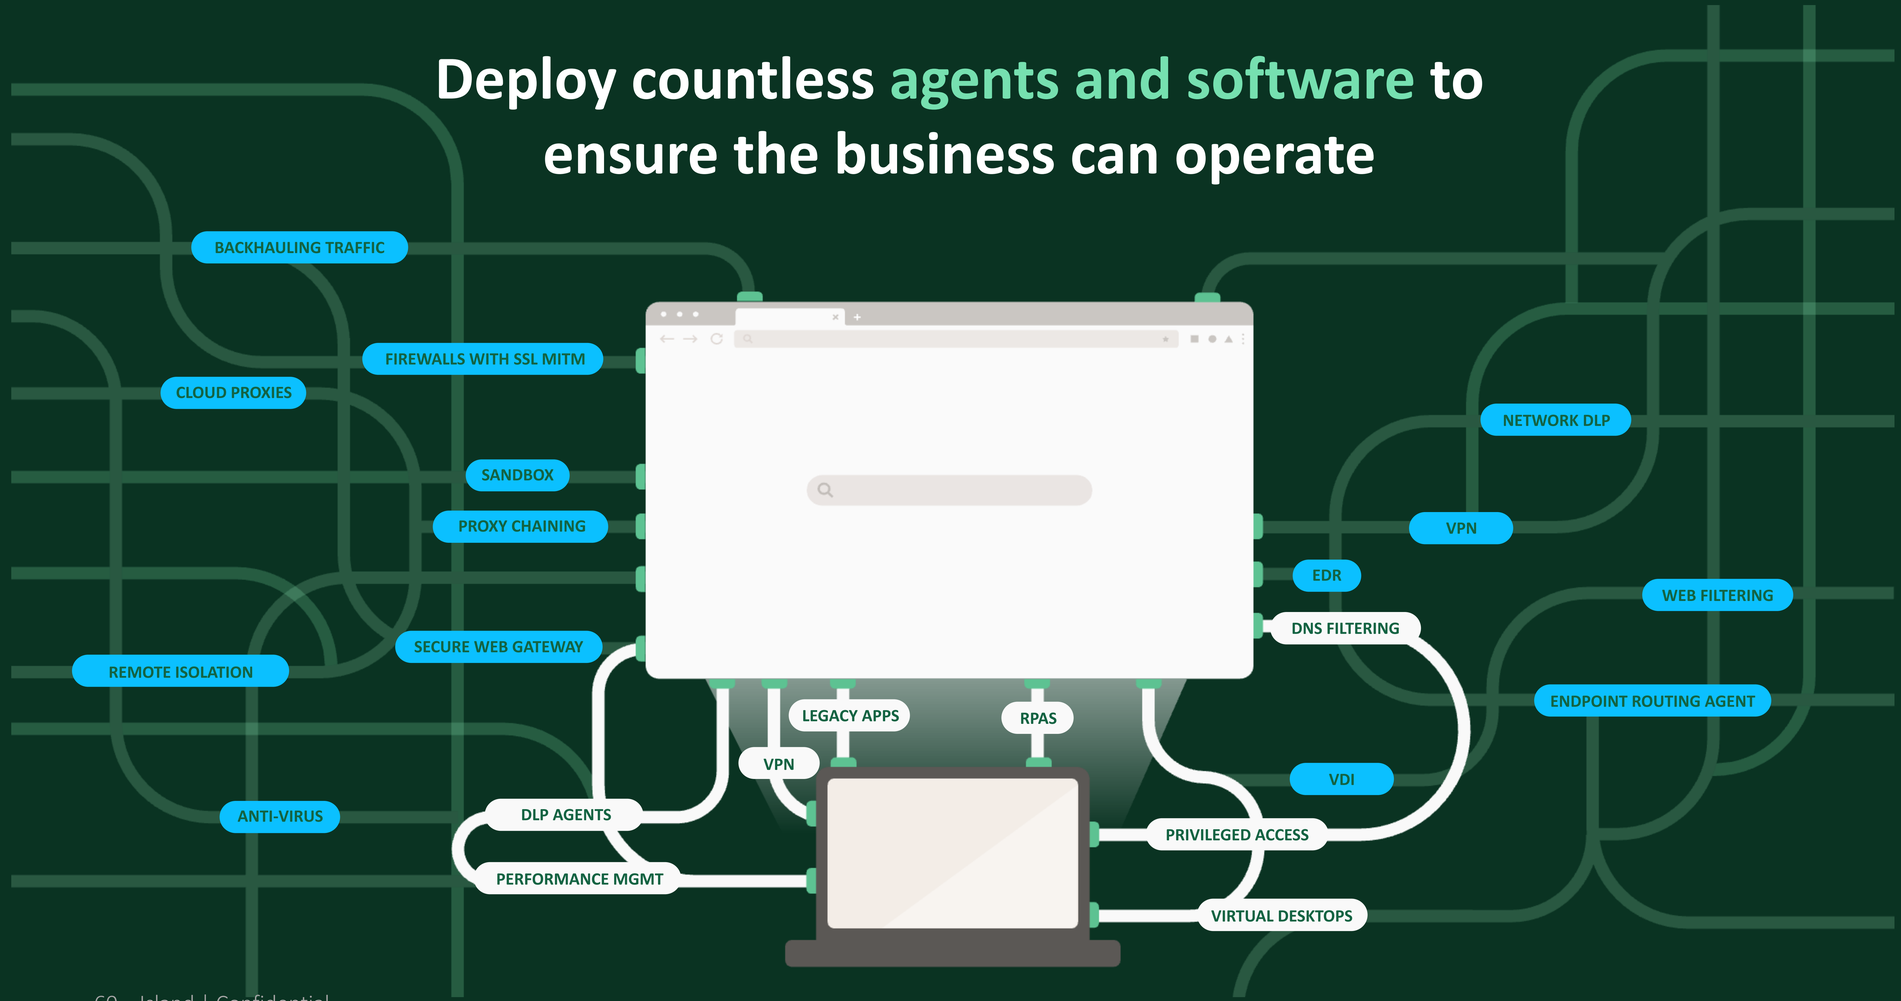

Except the browser isn’t an enterprise application delivery platform

So we surround it with an endless security stack.

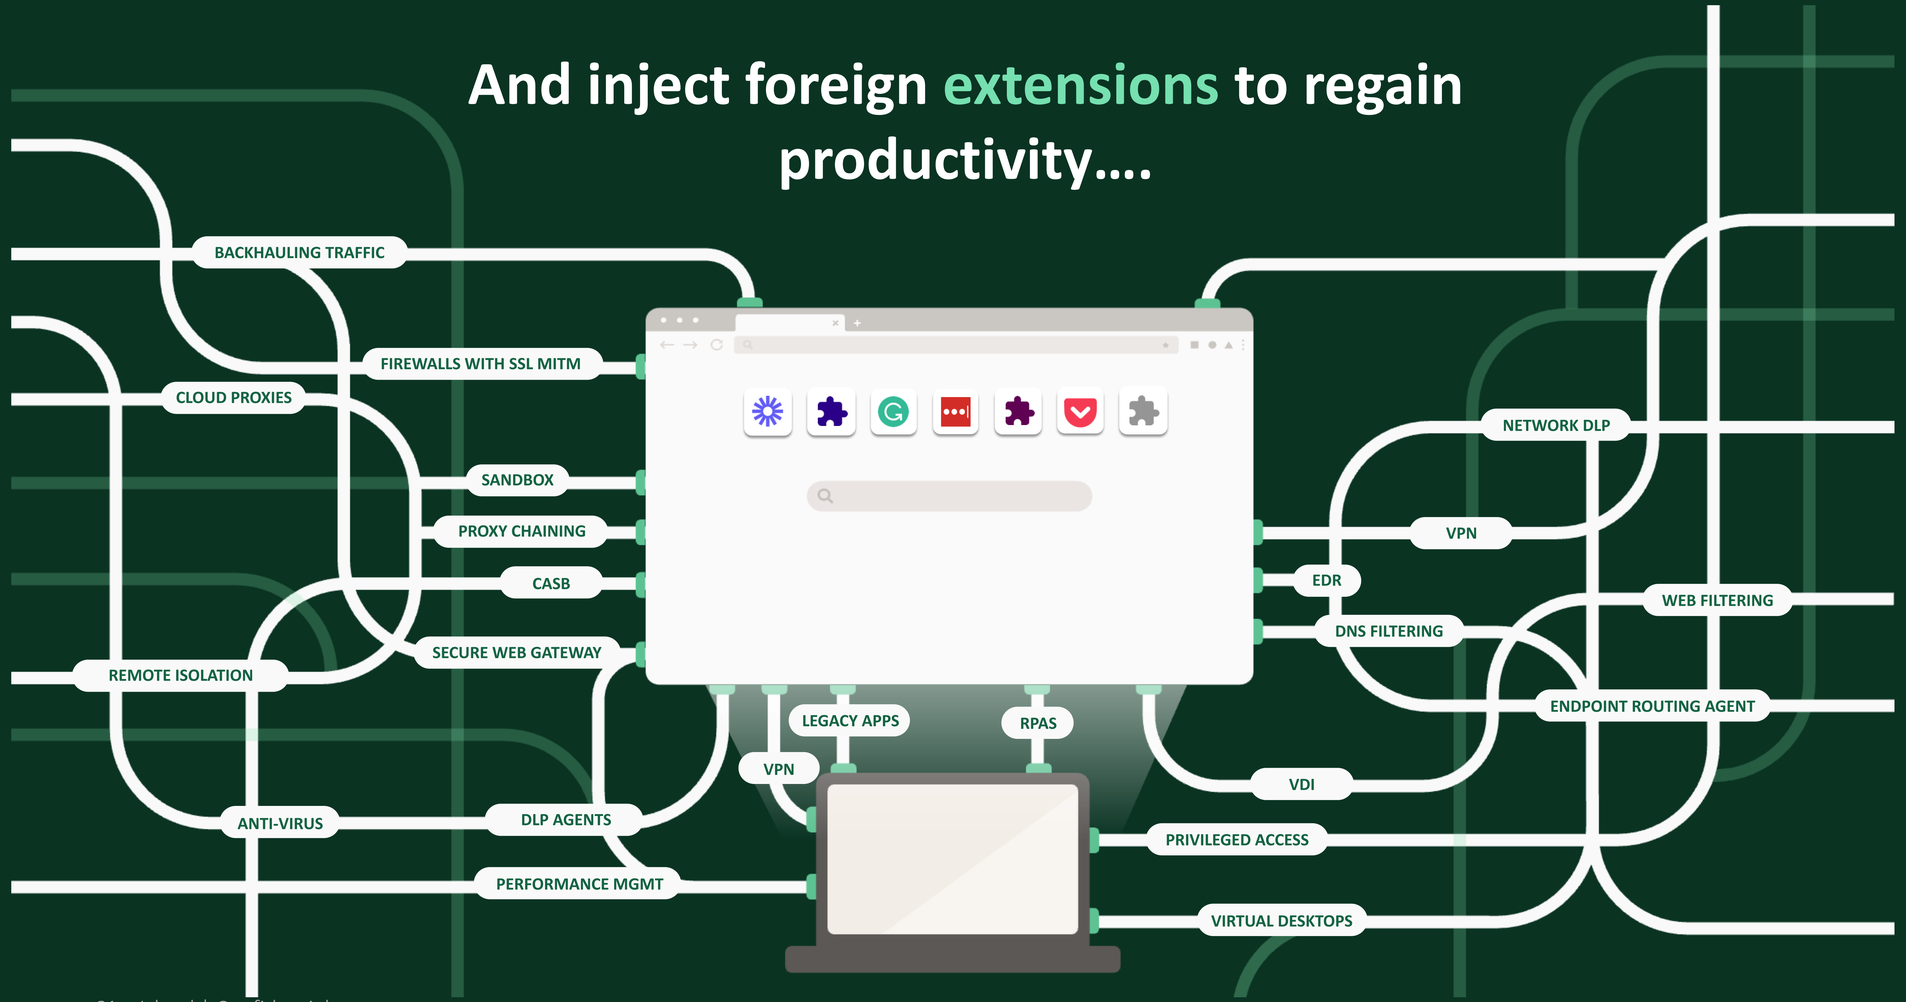

Island

Deploy countless agents and software to ensure the business can operate

Island

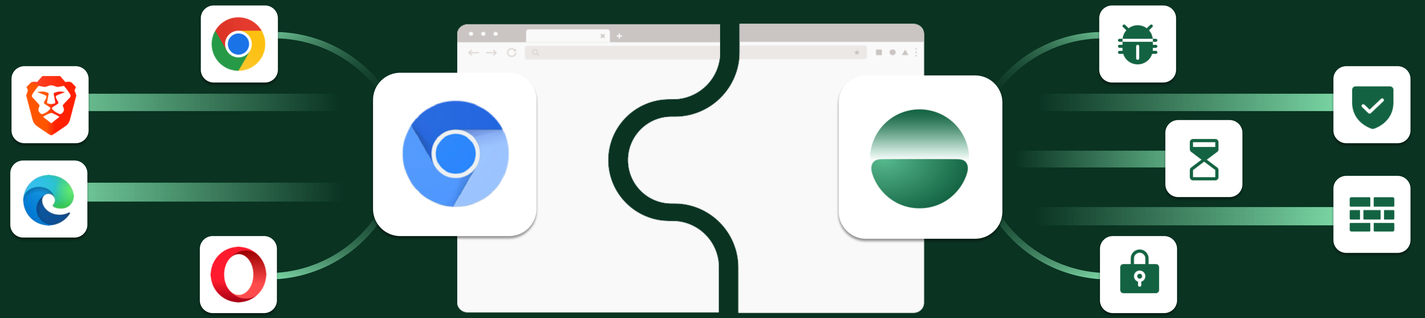

And inject foreign extensions to regain productivity….

Island

The Island Enterprise Browser

Transforming the Browser into a Core Enterprise Platform

Consumer Browser Features

- Networking
- Private Browsing
- User Experience (Look & Feel)
- Process Model & isolation
- Extensions
- Device / Data Synch
- Rendering Engine & Codecs

Enterprise Requirements

- Enterprise Trust
- Safe & Secure Browsing
- Browser-Based RPA
- Enterprise Productivity
- Privacy
- Configuration Management
- Management
- Last-Mile Control
- Security Integration
- User Experiences
- Traffic Management
- IT Supportability

Island

The Island Enterprise Browser

A Powerful Enterprise Platform at the Center of Work

Cyber Security

- Simplifies a complex and expensive control landscape
- Modern architectures to protect new and even legacy work paradigms
- Deep visibility making regulatory adherence much simpler

Lines-of-Business

- Easily and safely onboard new services and applications
- Proactive insights into technology friction
- Less expensive and simpler infrastructural resources supporting the efforts

End Users

- Very natural application experiences
- Extensive productivity assistance
- Ease of coaching and clarity on policy and privacy

Shared Capabilities

- **Last-Mile Controls**
  - Cut / Copy & Paste
  - Screen Capture
  - Print / Save
  - Download & Upload
  - Data Redaction
- **Browser-Based RPA**
- **Browser Enforcement**
- **Auditing, Logging & Forensics**
- **Device Posture (Assess & Enforcement)**
- **Internet Explorer Emulation**
- **Web Filtering**
- **Malware Inspection**
- **Secure Storage**
- **Security Tool Integration**
- **Management & Policy**

Core Use-Cases

Critical SaaS & Internal Web Apps

Ensure the data interactions with SaaS and Internal Web Apps remain fundamentally secure

Contractor, Consultants, BPO and Third-Party Access

Fully govern how contractors, business process outsources and other third parties interact with your apps & data

VDI Reduction

Replace an unpleasant and costly work experience with the fluid and familiar one and users expect

BYOD

Deliver a simple and secure vehicle for delivering viable BYOD programs to any unmanaged device ensuring privacy for both the user and the org

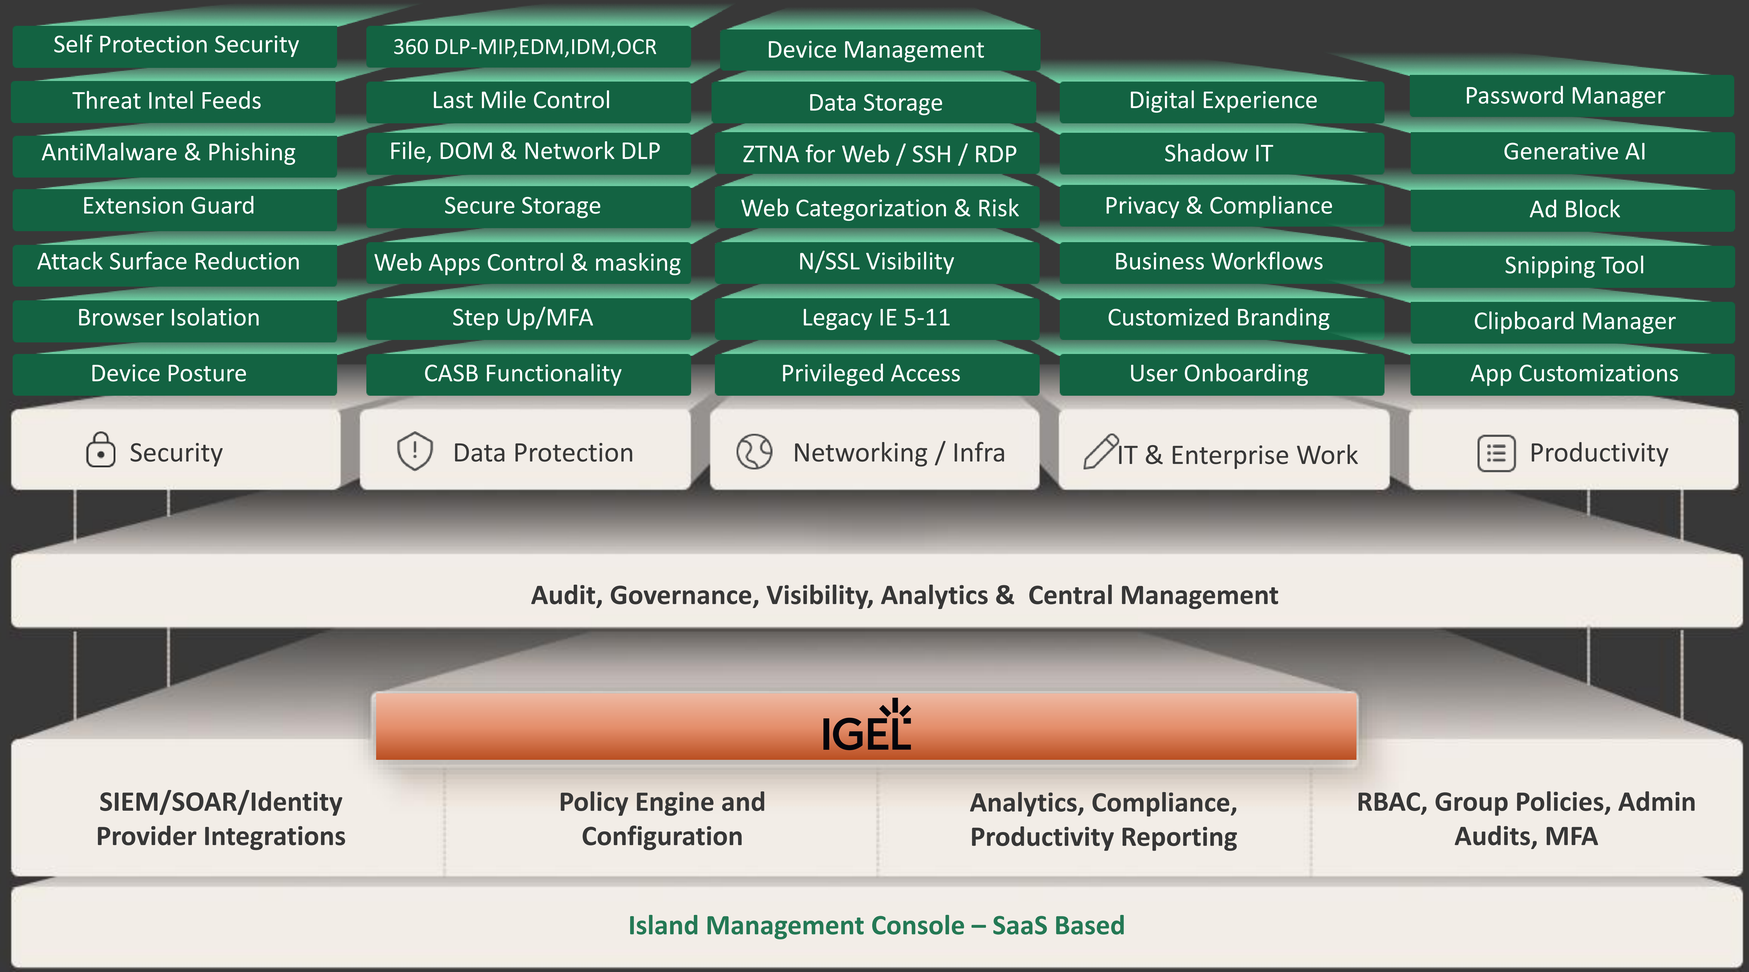

Code Red

Rapidly restore alternative path to key applications and services during a catastrophic cybersecurity breach / shutdown event

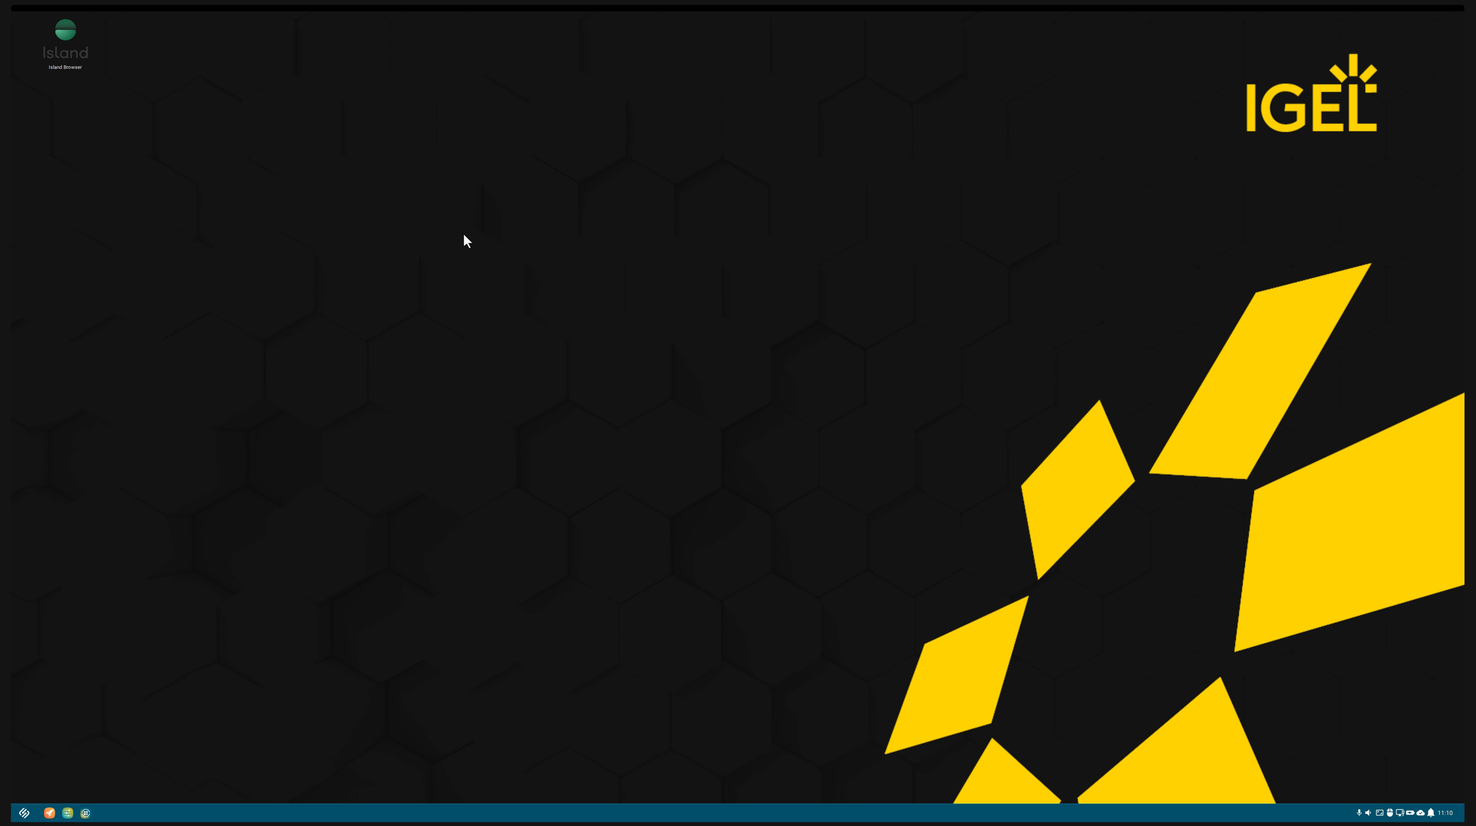

Additional Use Cases

- **Safely adopt generative AI** services
- Provide **native browser isolation**
- Safely **integrate M&As & joint ventures**
- Monitor & govern **call center workers**
- Protect against **ransomware attacks**
- Provision **disaster recovery browser**
- Gain insight into **resigning employees' behavior**
- Securely manage **divestiture of business units**
- Eliminate unnecessary **regulatory disclosures**
- Govern **developer access** & **usage of source code**
- Protect **pharmaceutical & chemical formulas**
- **Geo enforcement** for roaming users
- **Prevent unauthorized access** such as impossible travel
- **Privileged access** to critical resources for key audiences

Island on IGEL—from “power on” to Productivity in seconds…

The Future of Enterprise Browsers

Recent research published by Gartner®

"It is Gartner's belief that by 2031, enterprise browsers will grow to become platforms by which security and productivity software is delivered and consumed by the workforce on managed and unmanaged devices, creating a seamless experience between home and work."

Island

”Can we ’Island’ that?”

--Global CIO of top 3 US bank

Island & IGEL

- Abstract the layers, simplify the stack
- Enforce policy at the point of interaction
- Gain control over the application layer
- Environmentally Conscious
- Rapid time-to-value
- Massive ROI
