
IGEL
DISRUPT 24
The EUC Event for Now & Next

# Distributed App Repository

## Simplifies app deployment at scale

What it does:

- Maintains full control for UMS admins on how apps are provisioned
- Highly automated  rollout of apps
- All transactions are full trusted and encrypted
- Supports different app provisioning strategies

Improves app management for the following scenarios:

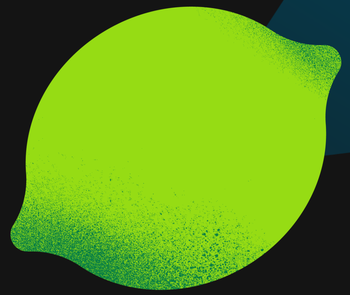

- Offline/air gapped infrastructures
- Branch offices with low-bandwidth connections
- Very large enterprise infrastructure

# IGEL App Creator Portal

# What do we have in common?

HELLO FRESH

# The most pressing need?

# What’s the most pressing need?

# 3 simple steps to get there

## 1. Get all components

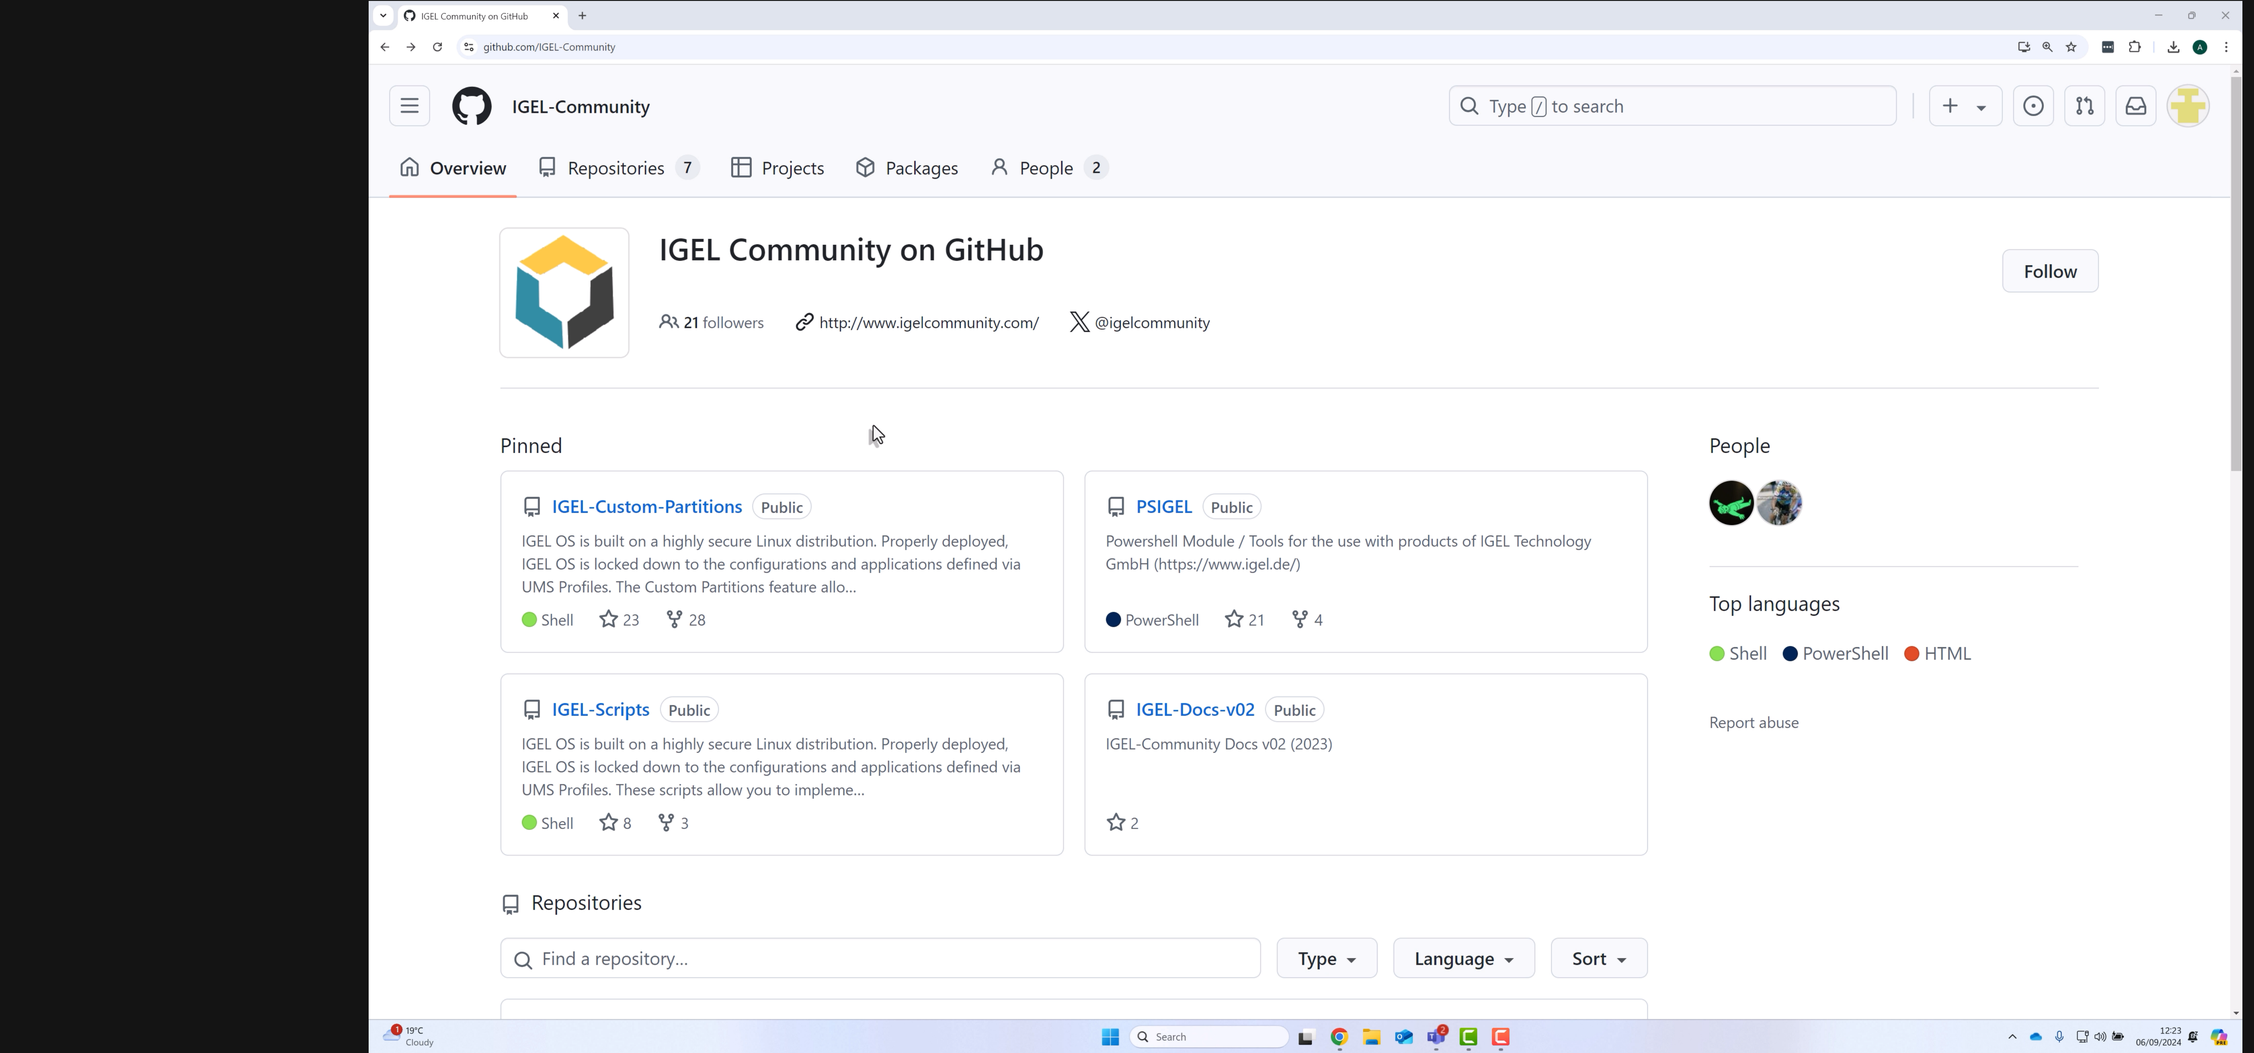

- Generate your own app key
- Download the reeipe (i.e. community GitHub)
- Download the required binaries

## 2. Create your app

- Login to App Creator Portal
- Upload recipe
- Upload binaries
- Create app

## 3. Deploy and use your app

- Deploy app key to UMS
- Deploy your app to UMS
- Generate a profile to deploy app key and app to IGEL OS12
- Run the app

UMS 12
Version 12.05.110

# Let’s run the video on an OS12 device

# Why to use IGEL OS12 apps

1

Version Control

2

Signed code

3

Fully manageable in UMS

4

Less complexity

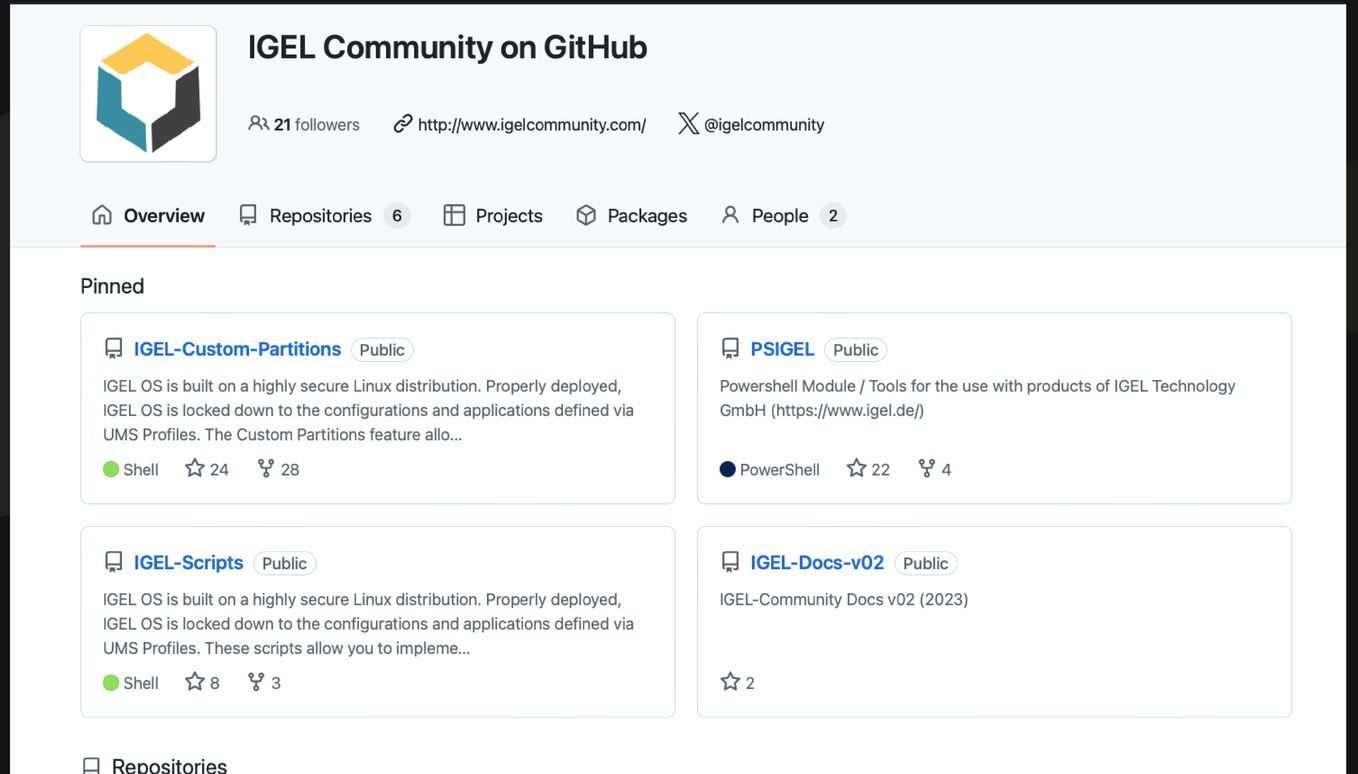

# Initial app recipes available on github

Productivity apps:

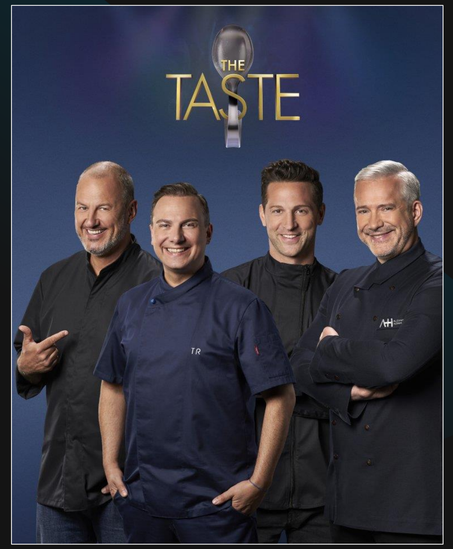

- LibreOffice
- SpeedCrunch calculator
- Mono .NET framework
- Keepassxc Password Manager
- Visual Studio code
- DGS TV digital signage
- Vlc media player

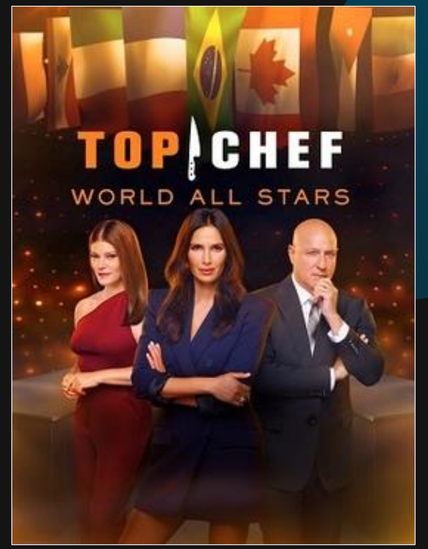

Fun apps:

- Supertuxkart Game
- cheese
- Frozenbubble Game

# What do you have in common with these TV shows?

# Available shortly after this DISRUPT event
