yubico

Partnering together for a more secure future

Making the internet safer with modern authentication.

Yubico makes secure login easy and available for everyone and is a leader in setting global standards for secure authentication since 2007

Stop phishing attacks and account takeovers before they start with modern, phishing-resistant multi-factor authentication (MFA). Stay ahead of evolving cyber threats and regulatory requirements with a proven solution which cannot be bypassed by malicious actors, unlike basic forms of MFA such as SMS, one-time passcodes and mobile authentication. Accelerate your zero trust strategy and gain a bridge to passwordless for enterprises, SMBs, individuals and developers.

Used by 9 of the top 10 technology companies

We make it easy to deploy modern, hardware MFA at scale. Distributing YubiKeys and onboarding users is simple and seamless with our expert guidance and enterprise subscription.

With a tried and true process that hundreds of organizations have followed already, and with a 'YubiKey as a Service' model, it's not a matter of if you'll be successful but when you'll be successful in raising your bar for security with modern, hardware-based security keys.

Loved by more than 5,000 businesses and 15+ million users in over 160 countries

Our leading technology has 1,000+ integrations, meaning your users can use Yubico's solutions out of the box with all the apps and services they love while keeping it simple for your IT team.

The Works with YubiKey program is your place to showcase your product's integrations and find all the ways you, your customers, and employees can stay secure with a YubiKey.

No matter where you are on your MFA journey, Yubico will meet you there.

All-in-one configurable security key

With a simple touch, the multi-protocol YubiKey protects access to computers, networks, and online apps and services.

Easier and safer than authenticator apps

No more reaching for your smartphone, or re-typing passcodes. Just plug in your YubiKey, tap, and it does the rest for you.

Works with hundreds of services

The YubiKey works with Windows and Mac login, Gmail, Dropbox, Facebook, Salesforce, Duo, and many more services.

Immediate impact

Yubico's phishing-resistant MFA and passwordless authentication make an immediate impact:
